#### **Transaction Details**

- Enterprise Value (EV) of €660m for 100% stake
- Implied EV/EBITDA of 4.6x based on LTM performance September 2022 (vs. an average of 11.3x for similar precedent transactions<sup>(1)</sup>)
- Subject to regulatory approvals the deal is expected to close in H1 2023

#### **Complementary Transaction**

- With the acquisitions of Noatum and GFS, AD Ports Group will further **expand its international footprint**, **strengthen its global network of partners**, and improve its overall connectivity
- Over the past 10 years, Noatum has demonstrated its ability to scale up quickly both organically as well as through M&A activity - By merging our existing logistics business with Noatum we will create a significant presence in the UAE and in our core regions to become a truly global logistics brand
- Noatum offers complementary operational footprint with no overlaps and appropriate scale
- Noatum acquisition makes us one of the key players in the Ro-Ro business globally and in the Mediterranean region in particular, which we intend to expand in our core markets

Unique opportunity to acquire a leading global integrated logistics platform

An essential transaction in building scale in our Logistics Cluster and supply chain density on a global basis

Well-established, robust platform with **no operational overlaps** that can expanded into the UAE and our core regions

Proven capabilities and track record to scale up quickly organically and through M&A activity

Significant expertise in Ro-Ro business and heavy lift logistics that we can bring to the UAE and our core regions

### In Line with AD Ports Group Strategy to Build Supply Chain Density Along Key Trade Routes

**Logistics** - Build a series of vertically-integrated, AD-intermediated global (3PL) supply chains to capture maximum value and build supply chain resilience for customers International International Abu Dhabi 📒 **End Client Origination Client** 骑 SQE  $\sim$ **F** R -**....** E. # Revenue Synergies and Cost Savings to Lead to Higher Profitability / Cashflows

### noatum logistics

#### Potential cost synergies:

- Lower air freight rates obtained from larger scale joint purchasing
- Cost optimization of support functions, including technology systems
- Noatum digital transformation

#### Potential revenue synergies:

 Potential to scale Noatum's Maritime agency services through AD Ports Group' operations

#### Potential cost synergies:

• Lower agency costs following the integration of Noatum's Maritime services within AD Ports Group

#### Potential revenue synergies:

 Leverage AD Ports Group commercial relationships to attract new shipping lines

#### Potential cost synergies:

- Best practices
- Technology/Digital systems

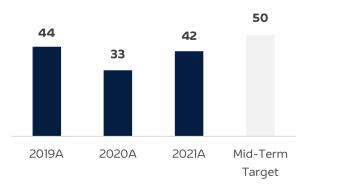

**Corporate Services:** Potential costs savings from the integration of corporate functions and services

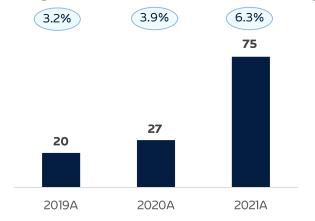

Logistics Net Revenue (m €) 1,193 611 692 5019A 2020A 2021A

#### Logistics Air Freight Volumes (K Tons)

#### Logistics EBITDA (m €) & EBITDA Margin (%)

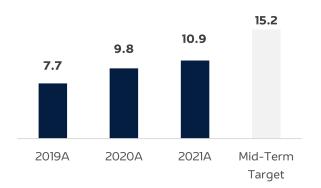

#### **Management Commentary**

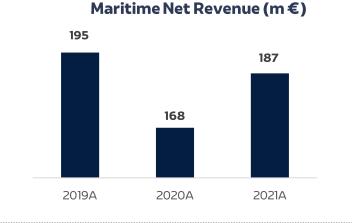

- Base case scenario factors in 50% decline in Ocean Freight rates in the medium term
- Base case scenario factors in 20% decline in Air Freight rates in the medium term
- Increasing scale and procurement initiatives should translate into further market share gains and limited margin erosion from 2021 level

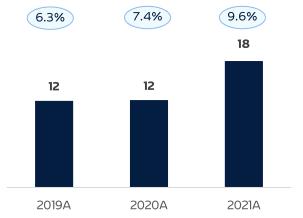

Maritime Comm. Representation Container Volumes (K TEUs) 184 169 162 169 162 2019A 2020A 2021A Mid-Term Target

#### Maritime Vessel Calls<sup>1</sup> ('000)

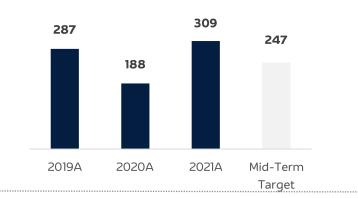

#### Maritime EBITDA (m €) & EBITDA Margin (%)

#### **Management Commentary**

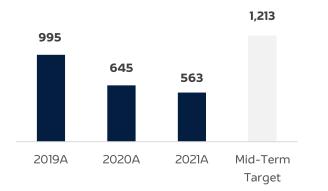

- Maritime business unit growth should be in line with market at around 3-5% p.a. depending on services: Commercial Representation-Containers, Tramp, Husbandry, and Ship services
- Stable margins from 2021
   levels driven by personnel
   cost efficiency

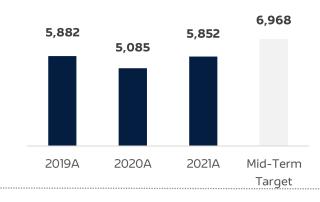

**Terminals Container Volumes (K TEUs)** 

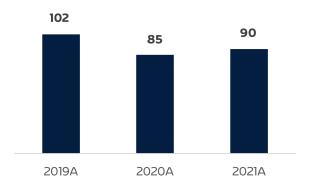

#### Terminals Ro-Ro Volumes (K Units)

Terminals Cargo Volumes<sup>1</sup> (Tons)

Terminals Net Revenue (m€)

#### Terminals EBITDA (m €) & EBITDA Margin (%)

#### **Management Commentary**

- Post-COVID volume driven growth of Bulk and Ro-Ro businesses
- Stable margins from 2021 levels as Bulk and Ro-Ro businesses make up the bulk of operating profitability

### Consolidated Financial KPIs LTM Sep 2022

#### **Management Commentary**

Consolidated EBITDA
 Margin<sup>1</sup> is expected to be in the range of 6.5% 8.0% in the medium term

 Annual Capex of €13-33m in the medium term, in line with historical levels

•

Minor EPS accretion in 2023, factoring a transaction fully funded through debt, an average cost of debt of 5.5%, and the current EUR:AED FX rate of 3.8. We expect stronger EPS accretion in the medium term with improved growth prospects and a 'normalization' of interest and FX rates

# Thank you
